

Modifying the Footprint of the Zero Emission Bus Implementation Project

Board of Directors | December 4, 2024

Modifying the Footprint of the ZEB Project

- Staff has identified the need for additional staging and laydown area in association with ZEB Project implementation.
- Acquisition of adjacent parcels 015180200 and 015180110 could serve this need, minimizing conflicts with other operational activities at North Base during construction.

Addendum to the CEQA Negative Declaration

- Staff has prepared an addendum to the previously-adopted Negative Declaration for the ZEB Project to incorporate the additional study area.
- This addendum does not automatically result in any property acquisition.

Requested Action Today

Staff recommends that the Board:

- Approve a modification of the footprint of the Zero Emission Bus Implementation Project at the North Base SamTrans bus facility.
- Adopt the associated addendum to the CEQA Negative Declaration adopted on December 7, 2022.
