What is the Grand Boulevard Initiative?

The Grand Boulevard Initiative (GBI) is a partnership between cities, countywide agencies, Caltrans, advocates, and business groups.

The purpose of GBI is to establish a cohesive countywide vision for modernizing El Camino Real (SR 82) to improve safety and mobility.

GBI builds upon local corridor studies

Every city in San Mateo County has been working on complete streets studies for El Camino.

In parallel, GBI serves as a forum for collaboration and continuity across these local studies.

Agenda

- Project Overview
- Why a Busway?
- Community Engagement

Project Overview

- The Dumbarton Rail Corridor (DRC) (Peninsula side) is a 5-mile inactive rail corridor that currently creates a barrier between communities in Southeast San Mateo County
- Since its acquisition by the District in the early 1990s, the DRC has been the subject of numerous studies to revive the corridor
- Previous studies and outreach consistently highlighted the need for:
 - Better local connectivity, including safer walking and biking
 - Improved crossings
 - Faster, more reliable transit for everyday trips
 - Near-term, cost-effective solutions

DRC today near Chilco Way

Project Overview and Study Area

The Reimagine Dumbarton project envisions converting the Dumbarton rail corridor into a rapid bus line, with additional walking & bicycle connections along and across the corridor.

Project purpose:

- Assess feasibility and community interest
- Refine the vision to address community needs and technical constraints
- Develop a project to move forward into further design and construction phases

Feasibility Study Schedule

Reimagine Dumbarton is guided by the following principles:

Fundable – rooted in realities of current funding landscape

Implementable – delivering improvements in the near-term

Responsive – building on what we have heard from the community

Effective – able to meet current and future travel demand needs

Why a Busway?

What is a Busway?

G Line (Los Angeles)

Wikipedia - [https://en.wikipedia.org/wiki/G_Line_\(Los_Angeles_Metro\)](https://en.wikipedia.org/wiki/G_Line_(Los_Angeles_Metro))

- 18 miles with 17 stations
- **Uses part of Southern Pacific Railroad's former Burbank Branch Line**
- Connects to other rail services and includes parallel **bike path**

U of M Transitway (Minneapolis)

flickr - <https://www.flickr.com/photos/diverse/43898973432/in/photostream/>

- 2.6-mile busway between University of Minnesota's Minneapolis and St Paul campuses
- **Limited to buses, bicycles, and emergency vehicles**

SURF! (Monterey)

MST - <https://mst.org/2020-annual-report/surf-busway-plans/>

- In construction now: **6-mile, bus only roadway along Monterey Branch Line right-of-way**
- **Preserving tracks for future rail use**
- Expected to start service in early 2028

Why a Busway?

- Fast, reliable transit service
- Improved connections and advances equity
- Potential for near-term implementation
- Flexible and compatible with active transportation
- Supports environmental justice
- Cost-effective
- Funding and partnership readiness
- Does not preclude future regional rail service

Meets Travel Needs Today and in the Future

Forecast Population and Employment Growth between 2020 and 2050 (C/CAG-VTA's Travel Demand Model)

- **High growth corridor**
 - Forecasts show both employment and residential growth
- **Increasing demand for more local trips**
 - Average daily travel between Redwood City and East Palo Alto increased by more than 30% since 2019
- **Efficient transit connections**
 - A dedicated busway could efficiently serve these emerging travel markets while improving connectivity to regional destinations

Community Engagement

Bus Transportation CAC Report December 2025

Ridership:

SamTrans: Due to data issues with Next Generation Clipper, the data presented for December 2025 is not complete. Data for riders using open payment to pay for their trip were not included in the ridership figures and are not available for the December 2025 SamTrans fixed-route ridership. Once the issues are resolved, December 2025 ridership data will be updated and incorporated into internal reporting systems and in future reports.

Based on data available, average weekday ridership across all four modes (Bus, Paratransit, Shuttles, and Microtransit) decreased by 2.6 percent in December 2025 compared to December 2024. The total monthly ridership decreased by 0.7 percent in December 2025 compared to December 2024.

Microtransit: Average weekday ridership on all Microtransit services was 151, and total ridership was 4,117. The average weekday ridership increased 39.6 percent compared to December 2024, and the total ridership increased 35.8 percent compared to December 2024.

Youth Unlimited Pass: For December 2025, Youth Unlimited Pass usage decreased 0.3 percent compared to December 2024.

Regarding Key Performance Indicators (KPI):

- **Preventable Accidents** – There were 22 preventable accidents in December 2025 (17 from District and 5 from contracted services). The goal is to have one or fewer preventable accidents per 100,000 miles; SamTrans did not meet its goal with 2.6 accidents per 100,000 miles.
- **Miles Between Service Calls (MBSC)** – There were 52 service calls in December 2025 (27 from District and 25 from contracted services). The goal is to have one or fewer service calls per every 25,000 miles. Fixed-route service did not meet its goal with 1.5 service calls per 25,000 miles.

- **On-Time-Performance (OTP)** – December 2025 systemwide OTP was 81.3 percent. The goal is to have 85 percent systemwide on-time performance. Fixed-route service did not meet this goal; however, on time performance improved by 0.9 percent compared to December 2024.
- **Did Not Operate (DNOs)** – In December 2025, there were 12 total DNOs. The goal is to miss less than 0.1 percent of scheduled trips. Fixed-route service met this goal with 0.02 percent missed trips.

Safety Campaign

The Safety Campaign continues to focus on “Pedestrian Awareness” especially near intersections and crosswalks. Operators are reminded to scan interior and exterior mirrors before every turn, pull-out, or deceleration. Blind spots are within 10 feet surrounding the bus. Look around the A-pillar and mirrors to confirm pedestrians are not obscured from sight. Always yield to pedestrians in crosswalks and anticipate their movements even if they are not looking. Expect the unexpected.

Employee of the Month (EOM) Recognitions, December 2025

Bus Operator EOM for North Base is **Steven Castagnola**. This is Steven’s fifth EOM Award during his 23 years of service with the District.

Bus Operator EOM for South Base is **Ricardo Francia**. This is Ricardo’s third EOM Award during his 22 years of service with the District.
